

**Company Recruitment team**  
*MathWorks*

October 3, 2016

Dear Sir or Madam,

I'm writing to apply for the Software Engineer in Test -Stateflow position in MathWorks.

I'm a recent graduate student from BU, aiming to become a full stack software architect. I could offering a strong foundation in software engineering and programming principles across multiple platforms. Experienced in object-oriented programming, developing, testing, debugging code, designing interfaces and administering systems and networks, I would be able to learn and master new technologies fast as well as being successful at working in team and self-directed settings.

Recently I just finished a Machine Learning course using Matlab and Python. I'm also very familiar finite state machine which i used for my master thesis. Moreover, I'm pretty confident at front-end Html/CSS/Javascript, Java web development and C++ due to my previous internship and project experience. I would be a good fit for this SDE-test position.

I could start working now or after December 2016 and I don't need any future sponsorship on H1b. If you are interested please feel free to contact me via email and we could set up an interview at anytime.

Yours faithfully,

**Dongtai Du**
