Company Recruitment team   September 27, 2016

Belvedere Trading LLC
10 South Riverside Plaza
Chicago, IL 60606, US

Dear Sir or Madam,

I'm writing to apply for the Software Engineer position in Belvedere Trading.

I'm a recent graduate student from BU, aiming to become a full stack software architect. I could offering a strong foundation in software engineering and programming principles across multiple platforms. Experienced in object-oriented programming, developing, testing, debugging code, designing interfaces and administering systems and networks, I would be able to learn and master new technologies fast as well as being successful at working in team and self-directed settings.

Recently I was the Teaching Assistant of a course focusing on C# .NET web development, which made me familiar with .NET technologies including ASP.NET and Microsoft SQL Server and other web development technologies such as HTML/CSS and JavaScript. Moreover, I'm pretty confident at Java web development and C++ due to my previous internship and project experience. I would be a good fit for any Entry-level software developer position.

I could start working now or after December 2016 and I don't need any future sponsorship on H1b. If you are interested please feel free to contact me via email and we could set up an interview at anytime.

Yours faithfully,

Dongtai Du
